

Hope for babies is rising —
WE CAN REACH OUR GOAL!

LOG IN >

Hi there,

My daughter, Nina, came into the world 9 weeks early and weighed less than 3 pounds. I'd worked as a nurse in the NICU for 14 years and had seen this experience a million times. But nothing prepared me for the moment I saw my own tiny, tiny baby. I worried about so many things ... her lungs, her brain, infection.

I've seen lots of babies die.

There's no doubt that we are among the lucky families. Nina is completely healthy and astounds us every day. We never forget the fact that, were it not for decades of March of Dimes research, her story could have been very different. It's so important to fundraise for March for Babies and help babies be born healthy and as close to term as possible.

We can reach our goal!

March for Babies is at 71% of its goal of raising \$3.5 million this week. If every one of us reaches out for just a few more donations, WE CAN DO THIS.

Goal:
\$3.5 million

To go:
\$1 million

Remaining:
3 days left

It's not too late. Let's make this a winning week to support lifesaving work!

Thank you sincerely,

Chris Centofanti
and the 2013 March of Dimes National Ambassador Family

I WANT TO HELP REACH OUR GOAL
